SINCE 1995

A COMPLETE WATER SOLUTION

Performance | Reliability | Innovation

About us

ABOUT BHOOMI

Bhoomi Sales embarked on a humble journey to make a positive impact wherever water is essential. Supported by an exceptional R&D team, innovative ideas, and industry-leading practices, Bhoomi has achieved its founding vision and continues to earn the trust of associations through its unwavering commitment to the industry's aspirations.

In 2016, we have started our business in Ahmedabad of Sales & Service of Hydro-Pneumatic Pressure Booster System, Curing System, Fire Pumps, Sewage Pump, Water Softener Plants, Solar Water Heater, etc. supplying to Residential/Commercial Building Segments to the Builder & Customer in need.

WHY CHOOSE **BHOOMI**

01

25+ YEARS OF
EXPERIENCE

02

QUALITY
PRODUCTS

03

RELIABLE
SERVICE

04

CUSTOMER
SATISFACTIONS

Our Clients

TRUSTED BY INDUSTRY LEADERS

Serving reputed builders, industries, infrastructure projects and commercial organizations across Gujarat with high-quality pumping solutions.

Delivering Dreams..

Hypn Pressure Boosting System

HYPN System is an automatic water pressure control system. It adjusts the pump speed based on water demand to maintain constant pressure and provide a smooth, reliable water supply. It is an efficient solution for modern water distribution systems.

System Components

Pressure
Tank

VFD Panel

Inline Vertical
pump

Bf-Valve
SS NRV

PT / PG

Product Features

- High Pressure Output
- Energy Efficient
- Automatic Pressure Control
- Stainless Steel Build
- Low Noise Operation
- Easy Maintenance

APPLICATIONS

- Residential Complexes
- Commercial Buildings
- Hotels & Hospitals
- Shopping Malls
- Industrial Water Supply
- Municipal Water Supply

HYPN Submersible Pressure System

Submersible Pump System can be customized with 2 to 6 pumps with control panel & accessories for automatic operation with motor protections.

System Components

Pressure Tank

VFD Panel

SUB Vertical pump

Bf-Valve
SS NRV

PT / PG

Product Features

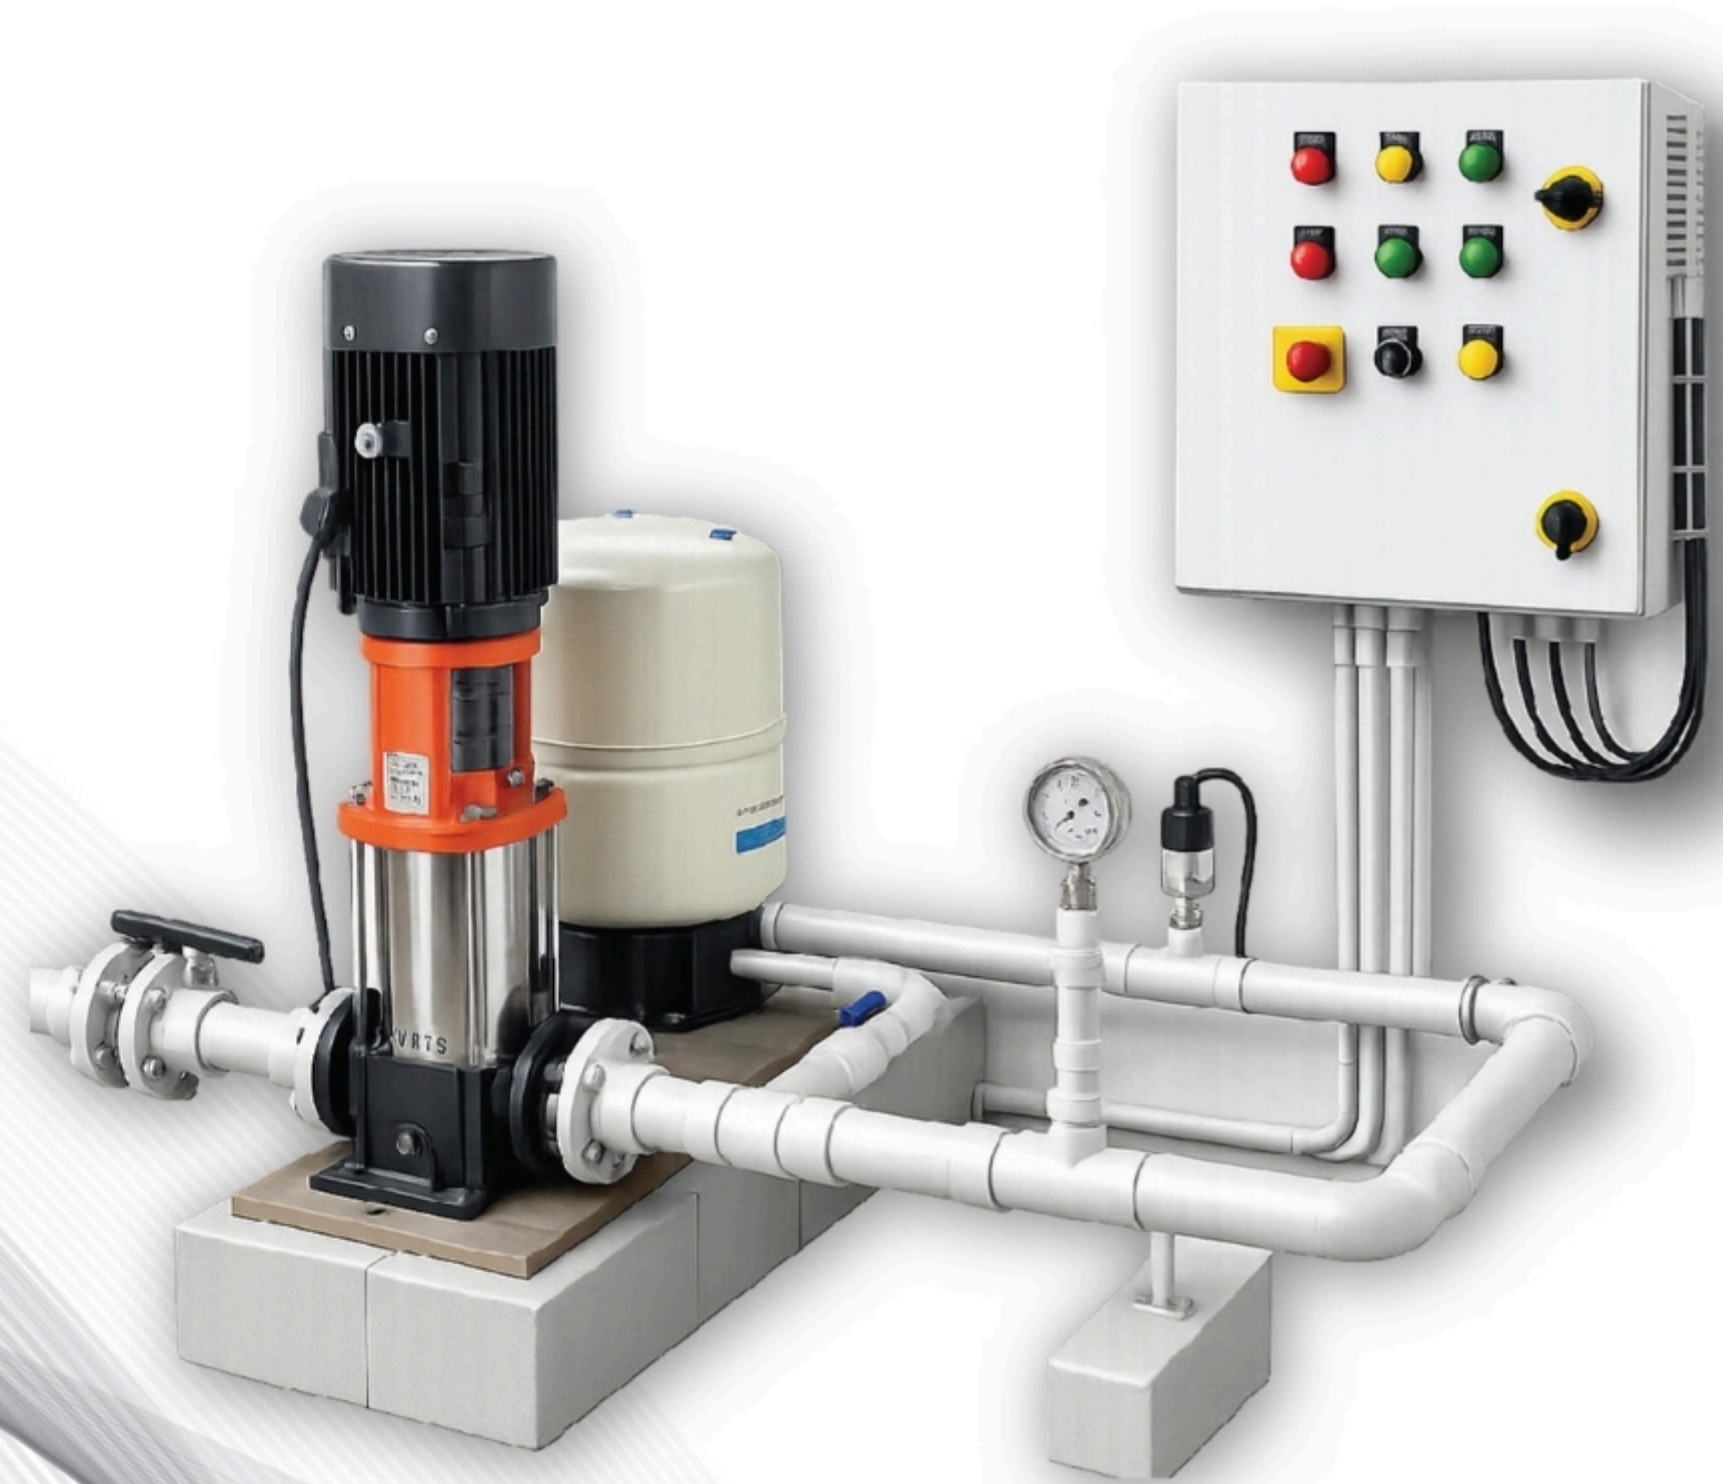

- Automatic Pressure Control
- Multi-Pump Operation
- Constant Water Pressure
- Smart Control Panel
- Dry Run Protection
- Energy Efficient Performance

APPLICATIONS

- High-Rise Buildings
- Hotels & Hospitals
- Residential Apartments
- Commercial Complexes
- Industrial Plants
- Schools & Institutions

Curing System

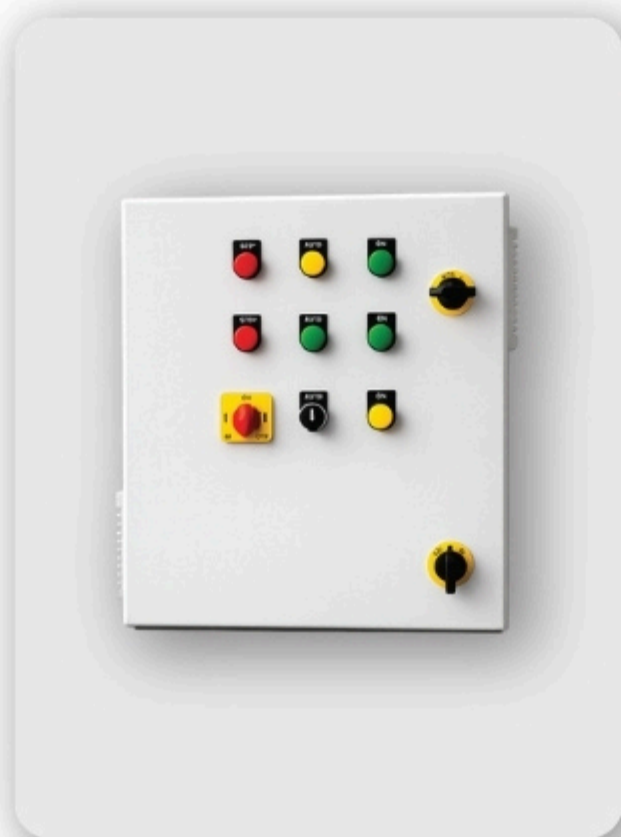

Under construction buildings always need water in large quantity for curing. Our customized solution will help to cater that water demand in every stage of buildings.

System Components

Pressure
Tank

VFD Curing
Panel

Inline Vertical
pump

SUB Vertical
pump

Bf-Valve SS NRV
PT / PG

Product Features

- High-Pressure Water Supply
- Floor-to-Floor Distribution
- Constant Water Pressure
- Smart Control Panel
- Dry Run Protection
- Energy Efficient Performance

APPLICATIONS

- Water Curing Applications
- Under-Construction Buildings
- High-Rise Buildings
- Industrial Construction Sites
- Commercial Complexes
- Multi-Storey Construction

Twins Pump Booster System

The Twin Pump VFD Pressure Booster System is an intelligent water pressure boosting solution designed to deliver consistent water pressure while minimizing energy consumption.

System Components

Pressure
Tank

VFD Panel

Horizontal
Pump

Bf-Valve
SS NRV

PT / PG

Product Features

- Constant Pressure
- Energy-Efficient VFD
- Auto Twin Pump
- Smart Pressure Control
- Low Noise Operation
- Corrosion-Resistant Build

APPLICATIONS

- Residential Apartments
- Commercial Buildings
- Hotels & Hospitals
- Shopping Malls
- High-Rise Buildings
- Industrial Water Supply

BOOSTER PUMPS

Intelligent Pump

Intelligent Pump is a multistage pump, controlled by a PCL microcomputer chip, mainly used for pressurization, household water supply, and automatic watering.

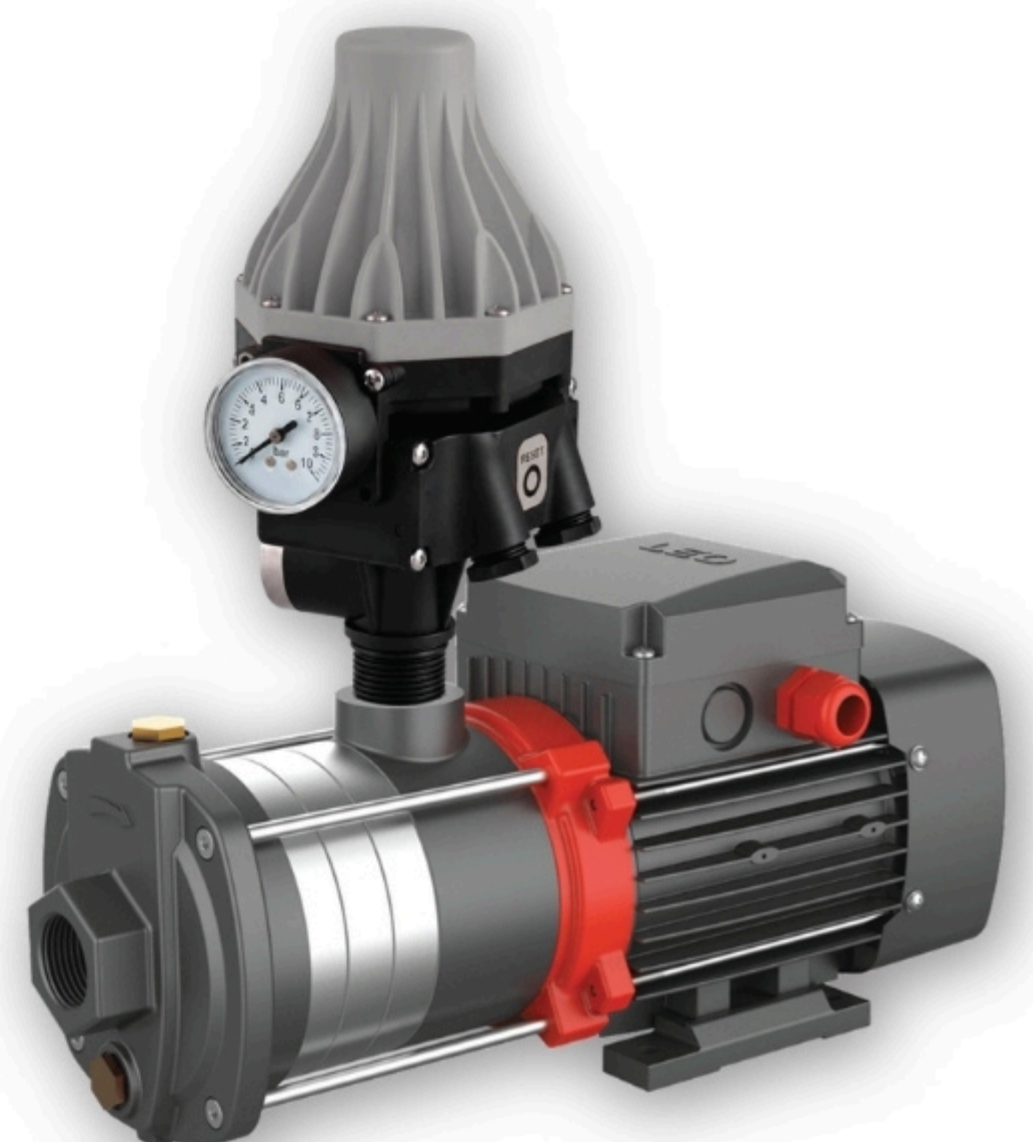

Traditional Pump

The Traditional Pump is a dependable water pressure system that delivers consistent water flow through automatic pressure control.

Controller Pump

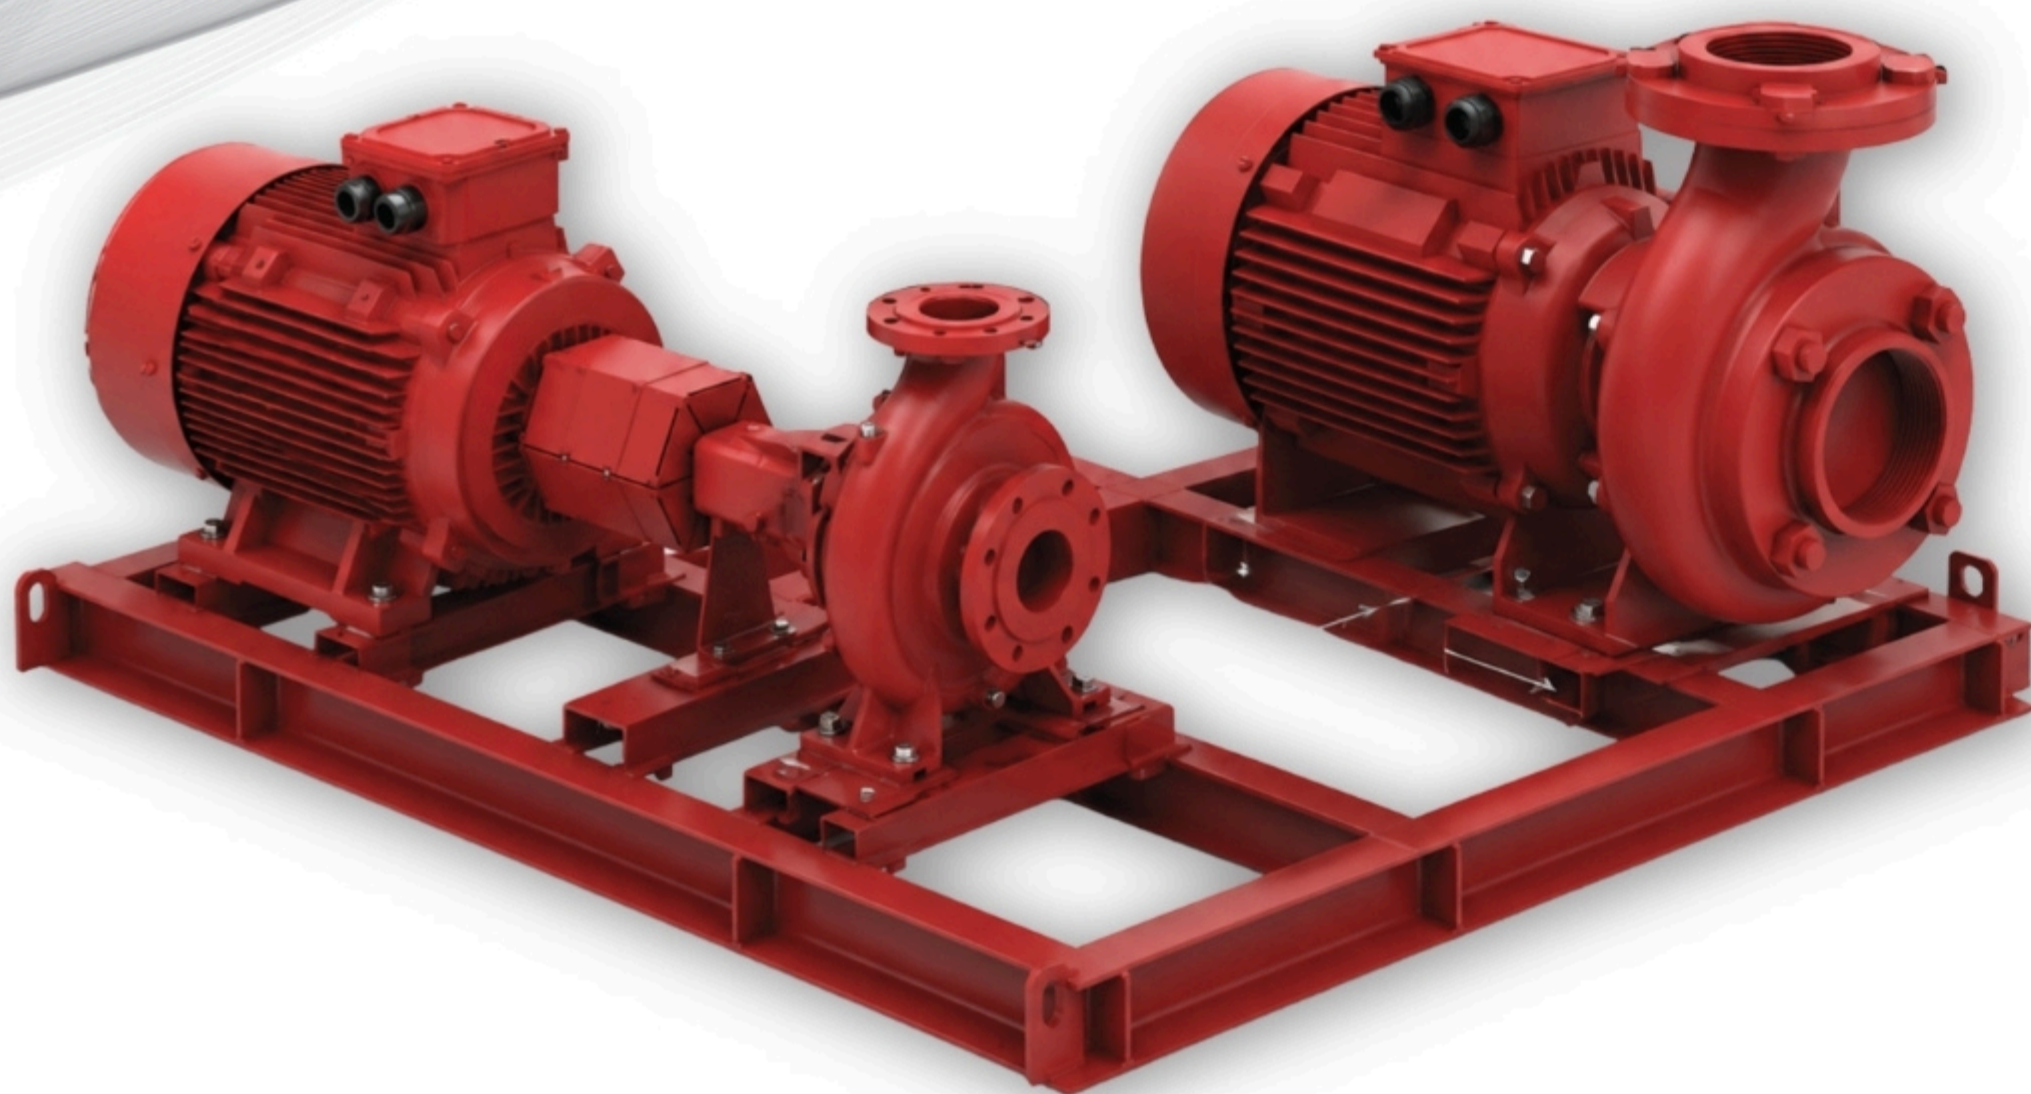

The Controller Pump automatically maintains consistent water pressure with smart pressure control and built-in pump protection.

Submersible Sewage Pump

Our Submersible Pump Series is engineered for reliable and efficient pumping of clean water, wastewater, sewage, and drainage applications. Built with high-quality materials and advanced hydraulic design, these pumps deliver powerful performance, energy efficiency, and long service life.

Fire Fighting Pump

Fire Fighting Pump Systems deliver reliable high-pressure water for efficient fire protection in residential, commercial, and industrial applications.

Residential Heat Pump

Heat Pumps are energy-efficient water heating systems that use advanced heat transfer technology to deliver hot water while consuming significantly less electricity than conventional water heaters.

Water Softener

Water Softeners are designed to remove hardness-causing minerals such as calcium and magnesium, delivering soft, clean water for everyday use.

Control panels

Multi VFD

This multi VFD Control Panel is designed for advanced monitoring and efficient control of industrial systems.

Control panel

This Industrial Electrical Control Panel System is designed for efficient control, monitoring, and protection of pumps, motors, and industrial equipment.

Digital Controller

This Digital Voltage & Phase Protection Controller is designed to protect electrical equipment from abnormal voltage and phase conditions.
